Investment Rationale and Objectives

OCP Senior Credit Fund provides Unitholders with exposure to the performance of an actively managed, diversified portfolio comprised primarily of first lien floating rate senior secured loans of non-investment grade North American issuers.

The Fund's objectives are: (i) provide Unitholders with attractive, quarterly, tax-advantaged distributions, currently targeted to be \$0.50 per annum, representing an annual yield of 5% based on the original issue price of \$10.00 per Unit; (ii) preserve capital; and (iii) generate enhanced returns through increasing cash flow to the portfolio as interest rates rise.

Commentary

Net performance of OCP Senior Credit Fund was 0.95% in December and 0.48% for the full year 2011. Following weakness early in December, the markets were encouraged by positive news from Europe and U.S. economic data reflecting improvements in housing, manufacturing, and employment. The CS Leveraged Loan Index, CS High Yield Bond Index, and S&P500 returned 0.51%, 2.47%, and 1.02% in the month, respectively.

The Fund's positive performance in the month was driven by net interest income as well as capital appreciation across the vast majority of its positions. There continued to be no defaults in the portfolio and we believe its holdings will perform as expected, paying off at par on or before their expected maturities.

The spread of the CS Leveraged Loan Index (assuming three year average life) tightened by 13 basis points to 656 basis points in December, well above the Index's historic average and therefore representing an attractive entry point into the senior loan asset class.
