Monthly Update as at September 30, 2012

Investment Rationale and Objectives

OCP Senior Credit Fund provides Unitholders with exposure to the performance of an actively managed, diversified portfolio comprised primarily of first lien floating rate senior secured loans of non-investment grade North American issuers.

The Fund's objectives are: (i) provide Unitholders with attractive, quarterly, tax-advantaged distributions, currently targeted to be \$0.50 per annum, representing an annual yield of 5% based on the original issue price of \$10.00 per Unit; (ii) preserve capital; and (iii) generate enhanced returns through increasing cash flow to the portfolio as interest rates rise.

Commentary

Net performance of OCP Senior Credit Fund was 1.77% and 11.87% in September and year-to-date, respectively. During the month, the world's two largest central banks, the U.S. Federal Reserve and European Central Bank, announced aggressive asset purchase programs, reducing investors' concerns over the persistent global economic risks. Global markets responded positively: the CS Leveraged Loan Index, CS High Yield Bond Index, and S&P500 returned 1.08%, 1.25%, and 2.58% in the month, respectively.

The large majority of the Portfolio's senior secured loan investments contributed to performance with approximately two-thirds of the gains driven by price appreciation and the balance by interest income. One of the Portfolio's positions repaid in full during the month and we added exposure to several existing and new senior secured loans. There continued to be no defaults in the Portfolio and we believe the Portfolio will perform as expected, with positions continuing to pay off at par on or before their expected maturities.
