

OCP SENIOR CREDIT FUND

Monthly Update as at April 30, 2016

Investment Rationale and Objectives

OCP Senior Credit Fund provides Unitholders with exposure to the performance of an actively managed, diversified portfolio comprised of senior secured loans and other senior debt obligations of non-investment grade North American issuers.

The Fund's objectives are: (i) provide Unitholders with attractive, quarterly distributions, currently targeted to be \$0.50 per annum, representing an annual yield of 5% based on the original issue price of \$10.00 per Unit; (ii) preserve capital; and (iii) generate enhanced returns through increasing cash flow to the portfolio as interest rates rise.

Commentary

Net performance of OCP Senior Credit Fund (the "Fund") was 2.60% and 4.67% for April and year-to-date, respectively. The CS Leveraged Loan, CS High-Yield and S&P 500 TR indexes returned 1.90%, 3.88% and 0.39%, and 3.25%, 7.21% and 1.74% during April and year-to-date, respectively.

Strong positive performance continued during the month of April as 90% of the Fund's positions were positive contributors, with the largest position adding 0.55% to gross performance. The largest positive contributor for the month was YRC Worldwide ("YRC").

The Fund owns the senior secured loans of YRC, a freight transporter of goods for businesses across North America. Our position traded up in April following the company's release of better-than-expected first quarter earnings. Despite overall softness in industry trucking volumes, YRC has continued to improve its EBITDA and margins through execution on network optimization and investments in technology. The company has remained focused on improving profitability, including by exiting businesses which have negatively impacted earnings.

You will usually pay brokerage fees to your dealer if you purchase or sell units of the investment fund on the Toronto Stock Exchange ("TSX"). If the units are purchased or sold on the TSX, investors may pay more than the current net asset value when buying units of the investment fund and may receive less than the current net asset value when selling them. There are ongoing fees and expenses associated with owning units of an investment fund. An investment fund must prepare disclosure documents that contain key information about the fund. You can find more detailed information about the fund in these documents. **The indicated rates of return are the historical annual compounded total returns including changes in unit value and reinvestment of all distributions and do not take into account certain fees (such as redemption fees or optional charges) or income taxes payable by any unitholder that would have reduced returns.** Investment funds are not guaranteed, their values change frequently and past performance may not be repeated.
