

# OCP SENIOR CREDIT FUND

Monthly Update as at June 30, 2016

## Investment Rationale and Objectives

OCP Senior Credit Fund provides Unitholders with exposure to the performance of an actively managed, diversified portfolio comprised of senior secured loans and other senior debt obligations of non-investment grade North American issuers.

The Fund's objectives are: (i) provide Unitholders with attractive, quarterly distributions, currently targeted to be \$0.50 per annum, representing an annual yield of 5% based on the original issue price of \$10.00 per Unit; (ii) preserve capital; and (iii) generate enhanced returns through increasing cash flow to the portfolio as interest rates rise.

## Commentary

Net performance of OCP Senior Credit Fund (the "Fund") was 0.31 and 7.03 for June and year-to-date, respectively. The CS Leveraged Loan, CS High-Yield and S&P 500 TR indexes returned 0.03%, 1.19% and 0.26%, and 4.23%, 9.30% and 3.84% during June and year-to-date, respectively.

Performance was effectively flat in June as Brexit concerns caused market participants to exercise caution and briefly tempered positive momentum. Following the announcement that the U.K. would exit the European Union, markets resumed some stability but it remains to be seen what the long-term effects will be on the credit markets. We continue to find attractive opportunities to augment the portfolio.

The Fund has more positive than negative positions, with most of the positions generating immaterial gains or losses. One of the more significant positive contributors was Innovacare a provider of Medicaid and Medicare Advantage plans and services.

The Fund's investment in Innovacare senior secured loans contributed 0.33% to gross performance in June after a May operating report indicated that the company was performing ahead of annual profit expectations, as a result of the Company's effective medical expense control.

You will usually pay brokerage fees to your dealer if you purchase or sell units of the investment fund on the Toronto Stock Exchange ("TSX"). If the units are purchased or sold on the TSX, investors may pay more than the current net asset value when buying units of the investment fund and may receive less than the current net asset value when selling them. There are ongoing fees and expenses associated with owning units of an investment fund. An investment fund must prepare disclosure documents that contain key information about the fund. You can find more detailed information about the fund in these documents. **The indicated rates of return are the historical annual compounded total returns including changes in unit value and reinvestment of all distributions and do not take into account certain fees (such as redemption fees or optional charges) or income taxes payable by any unitholder that would have reduced returns.** Investment funds are not guaranteed, their values change frequently and past performance may not be repeated.
